It was established that the serum of rabbits immu-  
 nized with human spermatozoa contained not only  
 complement-fixing antibodies and hetero- and iso-  
 sperm-agglutinins, but also spermocidal, re-  
 sponsible for phagocytosis of the human spermatozoa  
 by the rabbit leukocytes. In all the cases of sperm-  
 phagocytosis observed, the leukocytes seized the  
 spermatozoon by its tail by means of their protoplas-  
 mic pseudopodia. (Author)
